

PROVEN SAFETY, SUPERIOR CONSTRUCTION, SMOOTH OPERATION
T3N THROTTLE QUADRANT

PRODUCT INFORMATION SHEET

3 LEVER QUADRANT FEATURING KAWAK "SAFELock" TECHNOLOGY

The "SafeLock" feature prevents uncommanded movement of the propeller lever which can result in a potentially hazardous situation for the pilot, personnel, and bystanders.

Key Features and Components:

- Positive locks for flight idle, propeller, and condition
- Direct replacement for factory quadrants/ No modification necessary
- Ergonomic design reduces fatigue
- Ceramic coating and Mil-spec hard anodize for corrosion protection
- Stainless steel levers
- Simplified friction assembly design
- Low wear Oilite bronze bushings
- Infinite lever friction adjustment
- Mounting provisions for Air Tractor, Thrush, Ag Cat & other STC'd turbine installations

FAA STC# SA02266SE
